1.1 Description

Refer to this document to learn what changes were made to the documents, since you've read these last time.

The most recent changes are listed first.

1.2 ???

Per Einar Ellefsen:

- * Added `Apache::*` modules from core to complete the API. Reviewed the content, added right tags and indentation where needed.

- * `Apache::File`: added synopsis.

- * Added various other modules that were left-over. Some don't have much documentation, but that doesn't matter, the synopsis is usually enough.

- * Fixed all module names in "See Also" sections to link to the correct place if possible.

- * Reorganized everything into groups.

1.3 Thu Apr 18 12:28:00 CET 2002

- * Fixed titles and added `C<>` around all function names. [Per Einar Ellefsen <per.einar (at) skynet.be >]

1.4 Wed Mar 20 21:20:20 SGT 2002

- * Imported the pod file from the `mod_perl` distribution and cleaned up the broken pod. [stas]
