Emerging Infectious Diseases

Volume 3 • Number 1

January—March 1997

Perspective

- Designing an International Policy and Legal Framework for the Control of Emerging Infectious Diseases: First Steps 1 B.J. Plotkin and A.M. Kimball

Synopses

- Surface Antigens of the Syphilis Spirochete and Their Potential as Virulence Determinants 11 D.R. Blanco, J.N. Miller, and M.A. Lovett
- Mycoplasmas: Sophisticated, Reemerging, and Burdened by Their Notoriety 21 J.B. Baseman and J.G. Tully
- Fluoroquinolone Resistance in *Neisseria gonorrhoeae* 33 J.S. Knapp, K.K. Fox, D.L. Trees, and W.L. Whittington
- Infectious Diseases and Immunity: Special Reference to Major Histocompatibility Complex 41 N. Singh, S. Agrawal, and A.K. Rastogi
- Cryptosporidiosis: An Emerging, Highly Infectious Threat 51 R. L. Guerrant

Dispatches

- Isolation and Phylogenetic Characterization of Ebola Viruses Causing Different Outbreaks in Gabon 59 M-C. Georges-Courbot, A. Sanchez, C-Y Lu, S. Baize, E. Leroy, J. Lansout-Soukate, C. Tévi-Bénissan, A.J. Georges, S.G. Trappier, S.R. Zaki, R. Swanepoel, P.A. Leman, P.E. Rollin, C.J. Peters, S.T. Nichol, and T.G. Ksiazek
- The Epidemiology of Creutzfeldt-Jakob Disease in Canada: A Review of Mortality Data 63 E. Stratton, M.N. Ricketts, and P.R. Gully
- Exudative Pharyngitis Possibly Due to *Corynebacterium pseudodiphtheriticum*, a New Challenge in the Differential Diagnosis of Diphtheria 65 H.S. Izurieta, P.M. Strebel, T. Youngblood, D.G. Hollis, and T. Popovic
- Mycoplasmal Conjunctivitis in Wild Songbirds: The Spread of a New Contagious Disease in a Mobile Host Population 69 J.R. Fischer, D.E. Stallknecht, M.P. Luttrell, A.A. Dhondt, and K.A. Converse
- Knowledge-Based Patient Screening for Rare and Emerging Infectious/Parasitic Diseases: A Case Study of Brucellosis and Murine Typhus 73 C.N. Carter, N.C. Ronald, J.H. Steele, E. Young, J.P. Taylor, L.H. Russell, Jr., A.K. Eugster, and J.E. West

Letters

- Emergence of Epidemic O'nyong-nyong Fever in Southwestern Uganda, After an Absence of 35 Years 77 E.B. Rwaguma, J.J. Lutwama, S.D.K. Sempala, N. Kiwanuka, J. Kamugisha, S. Okware, G. Bagambisa, R. Lanciotti, J.T. Roehrig, and D.J. Gubler
- Prostatitis and Benign Prostatic Hyperplasia: Emerging Infectious Diseases? 77 B. Hennenfent
- Risk Factors for Severe Leptospirosis in the Parish of St. Andrew, Barbados 78 C.P. Douglin, C. Jordan, R. Rock, A. Hurley, and P.N. Levett
- Electronic Communication and the Rapid Dissemination of Public Health Information 80 C.B. Dalton, P.M. Griffin, and L. Slutsker

News and Notes

- Emerging Infectious Diseases Conference 82
- "Emergent Illness and Public Scholarship" Fellowships 82
- International Workshop on Molecular Epidemiology and Evolutionary Genetics 82

Cover photo: Immunostaining of Ebola virus antigens within subepithelial vascular endothelial cells in a skin biopsy from a chimpanzee that died during the 1996 Gabon outbreak; Dr. Sherif R. Zaki, Centers for Disease Control and Prevention, Atlanta, GA.

Emerging Infectious Diseases

Emerging Infectious Diseases is indexed in Index Medicus/Medline, Current Contents, and several other electronic databases.

Liaison Representatives

Anthony I. Adams, M.D.
Chief Medical Adviser
Commonwealth Department of Human
Services and Health
Canberra, Australia

David Brandling-Bennett, M.D.
Deputy Director
Pan American Health Organization
World Health Organization
Washington, D.C., USA

Gail Cassell, Ph.D.
Liaison to American Society for Microbiology
University of Alabama at Birmingham
Birmingham, Alabama, USA

Richard A. Goodman, M.D., M.P.H.
Editor, *MMWR*
Centers for Disease Control and Prevention
Atlanta, Georgia, USA

Thomas M. Gomez, D.V.M., M.S.
Staff Epidemiologist
U.S. Department of Agriculture Animal and
Plant Health Inspection Service
Riverdale, Maryland, USA

Joseph Losos, M.D.
Director General
Laboratory Center for Disease Control
Ontario, Canada

Gerald L. Mandell, M.D.
Liaison to Infectious Diseases Society of
America
University of Virginia Medical Center
Charlottesville, Virginia, USA

William J. Martone, M.D.
Senior Executive Director
National Foundation for Infectious Diseases
Bethesda, Maryland, USA

Phillip P. Mortimer, M.D.
Director, Virus Reference Division
Central Public Health Laboratory
London, United Kingdom

Robert Shope, M.D.
Professor of Research
University of Texas Medical Branch
Galveston, Texas, USA

Natalya B. Sipachova, M.D., Ph.D.
Scientific Editor
Russian Republic Information and
Analytic Centre
Moscow, Russia

Bonnie Smoak, M.D.
U.S. Army Medical Research Unit—Kenya
Unit 64109
Box 401
APO AE 09831-4109

Robert Swanepoel, B.V.Sc., Ph.D.
Head, Special Pathogens Unit
National Institute for Virology
Sandringham 2131, South Africa

Roberto Tapia-Conyer, M.D.
Dirección General de Epidemiología
Secretaría de Salud
México

Emerging Infectious Diseases

Emerging Infectious Diseases is published four times a year by the National Center for Infectious Diseases, Centers for Disease Control and Prevention (CDC), 1600 Clifton Road, Mailstop C-12, Atlanta, GA 30333, USA. Telephone 404-639-3967, fax 404-639-3039, e-mail ideditor@cdc.gov.

The opinions expressed by authors contributing to this journal do not necessarily reflect the opinions of CDC or the institutions with which the authors are affiliated.

All material published in *Emerging Infectious Diseases* is in the public domain and may be used and reprinted without special permission; proper citation, however, is appreciated.

Use of trade names is for identification only and does not imply endorsement by the Public Health Service or by the U.S. Department of Health and Human Services.

∞ *Emerging Infectious Diseases* is printed on acid free paper that meets the requirements of ANSI/NISO 239.48-1992 (Permanence of Paper).

Electronic Access to *Emerging Infectious Diseases*

If you have Internet access, you can retrieve the journal electronically on the World-Wide Web (WWW), through file transfer protocol (FTP), or by electronic mail (e-mail).

The journal is available in three file formats: ASCII, Adobe Acrobat (.pdf), and PostScript (.ps). The ASCII version does not contain figures. Both the .pdf and .ps files, however, contain graphics and figures and are true representations of the hard copy of the journal. The Adobe Acrobat format requires an Adobe Reader, which is available free of charge from CDC in DOS, Windows, UNIX, and Macintosh versions.

WWW and FTP: Access the journal at <http://www.cdc.gov/ncidod/EID/eid.htm> or from the CDC home page (<http://www.cdc.gov>). You can also download it through anonymous FTP at <ftp.cdc.gov>. The files can be found in the directory `pub/publications/eid`. A Spanish version of Vol. 1, No. 1–Vol. 2, No. 1 is available from the National University of La Plata, Faculty of Veterinary Science, Argentina (<ftp://fcv.medvet.unlp.edu.ar/pub/EID>).

LISTSERV (e-mail lists): To have the table of contents automatically sent to your e-mail box, subscribe to the EID-TOC mailing list. You can then obtain individual articles on WWW or through

FTP, or you can request copies by e-mail. To receive the entire journal, subscribe to one of three other lists: EID-ASCII sends the journal in ASCII format, EID-PDF sends the journal in Adobe Acrobat format, and EID-PS sends the journal in PostScript format. Because of the large file sizes and the complexity of sending the journal to different e-mail systems, we recommend that if you have WWW or FTP capabilities, you access *EID* in these ways rather than by e-mail lists. To subscribe to a list, contact listserv@cdc.gov with the following in the body of your message: `subscribe listname (e.g., subscribe EID-TOC)`.

Editorial Policy and Call for Articles

Emerging Infectious Diseases (EID) is a peer-reviewed journal established expressly to promote the recognition of emerging and reemerging infectious diseases and improve the understanding of factors involved in disease emergence, prevention, and elimination.

Emerging infections are new or newly identified pathogens or syndromes that have been recognized in the past two decades. Reemerging infections are known pathogens or syndromes that are increasing in incidence, expanding into new geographic areas, affecting new populations, or threatening to increase in the near future.

EID has an international scope and is intended for professionals in infectious diseases and related sciences. We welcome contributions from infectious disease specialists in academia, industry, clinical practice, and public health, as well as from specialists in economics, demography, sociology, and other disciplines. Inquiries about the suitability of proposed articles may be directed to the editor at 404-639-3967 (telephone), 404-639-3039 (fax), or eideditor@cdc.gov (e-mail).

EID is published in English and features three types of articles: Perspectives, Synopses, and Dispatches. The purpose and requirements of each type of article are described in detail below. A Spanish version of Vol. 1, No. 1–Vol 2, No. 1 is available electronically from the National University of La Plata, Faculty of Veterinary Science, Argentina (<ftp://fvc.medvet.unlp.edu.ar/pub/EID>).

Instructions to Authors

Manuscripts should be prepared according to the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" (*JAMA* 1993;269[17]:2282-6).

Begin each of the following sections on a new page and in this order: title page, abstract, text, acknowledgments, references, each table, figure legends, and figures. On the title page, give complete information about each author (full names and highest degree). Give current mailing address for correspondence (include fax number and e-mail address). Follow Uniform Requirements style for references. Consult *List of Journals Indexed in Index Medicus* for accepted journal abbreviations. Tables and figures should be numbered separately (each beginning with 1) in the order of mention in the text. Double-space everything, including the title page, abstract, references, tables, and figure legends. Italicize scientific names of organisms from species names all the way up, except for vernacular names (viruses that have not really been speciated, such as coxsackievirus and hepatitis B; bacterial organisms, such as pseudomonads, salmonellae, and brucellae).

All articles are reviewed by independent reviewers. The Editor reserves the right to edit articles for clarity and to modify the format to fit the publication style of *Emerging Infectious Diseases*.

Documents sent in hardcopy should also be sent on diskette, or by e-mail. Acceptable electronic formats for text are ASCII, WordPerfect, AmiPro, DisplayWrite, MSWord, MultiMate, Office Writer, WordStar, or Xywrite. Send graphics documents in Corel Draw, Harvard Graphics, Freelance, or save as .TIF (TIFF), .GIF (CompuServe), .WMF (Windows Metafile), .EPS (Encapsulated Postscript), or .CGM (Computer Graphics Metafile). The preferred font for graphics files is Helvetica. If possible, convert Macintosh files into one of the suggested formats. Submit photographs as glossy, camera-ready photographic prints.

Send all manuscripts and correspondence to the Editor, Emerging Infectious Diseases, National Center for Infectious Diseases, Centers for Disease Control and Prevention, 1600 Clifton Road, Mailstop C-12, Atlanta, GA 30333, USA, or by e-mail to eideditor@cdc.gov.

Perspectives: Contributions to the Perspectives section should provide insightful analysis and commentary about new and reemerging infectious diseases or related issues. Perspectives may also address factors known to influence the emergence of infectious diseases, including microbial adaptation and change; human demographics and behavior; technology and industry; economic development and land use; international travel and commerce; and the breakdown of public health measures. Articles should be approximately 3,500 words and should include references, not to exceed 40. Use of additional subheadings in the main body of the text is recommended. If detailed methods are included, a separate section on experimental procedures should immediately follow the body of the text. Photographs and illustrations are encouraged. Provide a short abstract (150 words) and a brief biographical sketch.

Synopses: Submit concise reviews of infectious diseases or closely related topics. Preference will be given to reviews of emerging and reemerging infectious diseases; however, timely updates of other diseases or topics are also welcome. Synopses should be approximately 3,500 words and should include references, not to exceed 40. Use of subheadings in the main body of the text is recommended. If detailed methods are included, a separate section on experimental procedures should immediately follow the body of the text. Photographs and illustrations are encouraged. Provide a short abstract (150 words) and a brief biographical sketch.

Dispatches: Provide brief updates on trends in infectious diseases or infectious disease research. Include descriptions of new methods for detecting, characterizing, or subtyping emerging or reemerging pathogens. Developments in antimicrobial drugs, vaccines, or infectious disease prevention or elimination programs are appropriate. Case reports are also welcome. Dispatches (1,000 to 1,500 words of text) should not be divided into sections. Provide a short abstract (50 words); references, not to exceed 10; and figures or illustrations, not to exceed two. To expedite publication of information of a more urgent nature, we post the journal's dispatches on the Internet as soon as they are cleared and edited. As soon as the full issue is completed, these dispatches become part of the issue.
