Vol. 1, No. 3, July–September 1995

Emerging Infectious Diseases

Streptococcal Toxic-Shock Syndrome	Dennis L. Stevens
Spiral Bacteria in the Human Stomach	Andre Dubois
HIV-1 Patients May Harbor Viruses of Different Phylogenetic Subtypes	Danuta Pieniazek
Simultaneous Infection of *Ixodes ricinus* Nymphs by Two *Borrelia burgdorferi* Sensu Lato Species	Bruno Pichon
Relationships Between Romanian and Brazilian HIV-Subtype F Strains	Claudiu I. Bandea
Salmonella on the Superhighway	Barbara E. Mahon
Reemergence of Ebola Virus in Africa	Anthony Sanchez
Prospects for the Control of Bolivian Hemorrhagic Fever	Paul E. Kilgore
Conference on Emerging Infectious Diseases	James M. Hughes
Japanese Encephalitis Acquired in Australia	
Guidelines to Prevent Opportunistic Infections in HIV-Infected Persons	Jonathan E. Kaplan
Prevention and Control of Emerging Infectious Diseases in the Americas	Daniel B. Epstein
Emerging Infectious Diseases Laboratory Fellowship Program	
ASTPHLD Conference on Human Retrovirus Testing	James L. Pearson

and Prevention (CDC)
Atlanta, Georgia, USA

William Hueston, D.V.M., Ph.D
Acting Leader, Center for Animal Health
Monitoring
Centers for Epidemiology and Animal Health
Veterinary Services, Animal and Plant
Health Inspection Service
U.S. Department of Agriculture
Fort Collins, Colorado, USA

James LeDuc, Ph.D.
Advisor for Arboviral Diseases
Division of Communicable Diseases
World Health Organization
Geneva, Switzerland

Joseph Losos, M.D.
Director General
Laboratory Center for Disease Control
Ontario, Canada

Gerald L. Mandell, M.D.
Liaison to Infectious Diseases Society
of America
University of Virginia Medical Center
Charlottesville, Virginia, USA

Robert Shope, M.D.
Director, Yale Arbovirus Research Unit
Yale University School of Medicine
New Haven, Connecticut, USA

Bonnie Smoak, M.D.
Chief, Dept of Epidemiology
Division of Preventive Medicine
Walter Reed Army Institute of Research
Washington, D.C., USA

Robert Swanepoel, B.V.Sc., Ph.D.
Head, Special Pathogens Unit
National Institute for Virology
Sandrinham 2131, South Africa

Roberto Tapia, M.D.
Director General de Epidemiología
Dirección General de Epidemiología
Secretaría de Salud
México

Morag Timbury, M.D.
Director
Central Public Health Laboratory
London, United Kingdom

Emerging Infectious Diseases

Emerging Infectious Diseases is published four times a year by the National Center for Infectious Diseases, Centers for Disease Control and Prevention (CDC), 1600 Clifton Road., Mailstop C-12, Atlanta, GA 30333, USA. Telephone 404-639-3967, fax 404-639-3039, e-mail eideditor@cidod1.em.cdc.gov.

The opinions expressed by authors contributing to this journal do not necessarily reflect the opinions of CDC or the institutions with which the authors are affiliated.

All material published in Emerging Infectious Diseases is in the public domain and may be used and reprinted without special permission; proper citation, however, is appreciated.

Use of trade names is for identification only and does not imply endorsement by the Public Health Service or by the U.S. Department of Health and Human Services.

Editorial and Computer Support

Emerging Infectious Diseases receives editorial and computer support from the Office of Planning and Health Communication, National Center for Infectious Diseases.

Beatrice T. Divine, M.B.A.
Anne D. Mather
Carol D. Snarey, M.A.

Production
Jo Altman

Electronic Distribution
Carol Y. Crawford
Cheryl G. Shapiro, M.S.

Electronic Access to *Emerging Infectious Diseases*

If you have Internet access, you can retrieve the journal electronically through file transfer protocol (FTP), electronic mail, or World-Wide Web (WWW).

The journal is available in three file formats: ASCII, Adobe Acrobat (.pdf), and PostScript (.ps). The ASCII version of the journal does not contain figures. Both the .pdf and .ps files, however, contain graphics and figures and are true representations of the hard copy of the journal. The Adobe Acrobat format requires an Adobe Reader. This reader is available in DOS, Windows, UNIX, and Macintosh versions. Installation instructions come with the Adobe software.

Access Methods

FTP: Download the journal through anonymous FTP at ftp.cdc.gov. The files can be found in the *pub/Publications/EID* directory in each of the file types listed above.

WWW: Launch WWW browser for the Internet and connect to the following address: http://www.cdc.gov. Your WWW software will allow you to view, print, and retrieve journal articles.

LISTSERVer (e-mail lists): You may have the table of contents sent to your e-mail box by subscribing to the EID-TOC mailing list. When you subscribe to this list, you automatically receive the table of contents and will be able to receive individual journal articles by FTP or e-mail.

If you choose to receive the entire journal, you may subscribe to one of three other lists. EID-ASCII sends the journal in ASCII format. EID-PDF sends the journal in Adobe Acrobat format. You can get the free Adobe Acrobat Reader by subscribing to the list. EID-PS sends the journal in PostScript format. However, because of the large file sizes and the complexity of sending the journal to different e-mail systems, it is strongly recommended that if you have FTP capabilities, you choose to access EID through FTP rather than by e-mail lists.

To subscribe to a list, send an e-mail to lists@list.cdc.gov with the following in the body of your message: subscribe *listname* (e.g., subscribe EID-ASCII). Once you have requested a subscription, you will receive further instructions by e-mail.

For more information about receiving *Emerging Infectious Diseases* electronically, send an e-mail to eidhelp@cidod1.em.cdc.gov.

Editorial Policy and Call for Articles

The goals of *Emerging Infectious Diseases* (EID) are to promote the recognition of new and reemerging infectious diseases and to improve the understanding of factors involved in disease emergence, prevention, and elimination. EID has an international scope and is intended for professionals in infectious diseases and related sciences. We welcome contributions from infectious disease specialists in academia, industry, clinical practice, and public health as well as from specialists in economics, demography, sociology, and other disciplines whose study elucidates the factors influencing the emergence of infectious diseases.

EID will be published in English and will feature three types of articles: *Perspectives*, *Synopses*, and *Dispatches*. The purpose and requirements of each type of article are described in detail below.

Instructions to Authors

Editorial Material: Manuscripts should be prepared according to the "Uniform Requirements for Manuscripts Submitted to Biomedical Journals" (JAMA 1993:269[17]: 2282-6).

Begin each of the following sections on a new page and in this order: title page, abstract, text, acknowledgments, references, each table, figure legends, and figures. On the title page, give complete information about each author (full names and highest degree). Give current mailing address for correspondence (include fax number and e-mail address). Follow Uniform Requirements style for references. Consult *List of Journals Indexed in Index Medicus* for accepted journal abbreviations. Tables and figures should be numbered separately (each beginning with 1) in the order of mention in the text. Double-space everything, including the title page, abstract, references, tables, and figure legends. Italicize scientific names of organisms from species name all the way up, except for vernacular names (viruses that have not really been speciated, such as coxsackievirus and hepatitis B; bacterial organisms, such as pseudomonads, salmonellae, and brucellae).

Perspectives: Contributions to the Perspectives section should address factors known to influence the emergence of infectious diseases, including microbial adaption and change; human demographics and behavior; technology and industry; economic development and land use; international travel and commerce; and the breakdown of public health measures. Articles should be approximately 3,500 words and should include references, not to exceed 40. The section should begin with an introduction outlining the relationship of the issues discussed in the paper to the emergence of infectious diseases. Use of additional subheadings in the main body of the text is recommended. If detailed methods are included, a separate section on experimental procedures should immediately follow the body of the text. Photographs and illustrations are optional. Provide a short abstract (150 words) and a brief biographical sketch.

***Synopses*:** Submit concise reviews of infectious diseases or closely related topics. Preference will be given to reviews of new and emerging diseases; however, timely updates of other diseases or topics are also welcome. Synopses should be approximately 3,500 words and should include references, not to exceed 40. The section should begin with an introduction outlining the relationship of the issues discussed in the paper to the emergence of infectious diseases. Use of additional subheadings in the main body of the text is recommended. If detailed methods are included, a separate section on experimental procedures should immediately follow the body of the text. Photographs and illustrations are optional. Provide a short abstract (150 words) and a brief biographical sketch.

Dispatches: Provide brief updates on trends in infectious diseases or infectious disease research. Dispatches (1,000 to 1,500 words of text) should not be divided into sections. Dispatches should begin with a brief introductory statement about the relationship of the topic to the emergence of infectious diseases. Provide references, not to exceed 10, and figures or illustrations, not to exceed two.

All articles will be reviewed by independent reviewers. The Editor reserves the right to edit articles for clarity and to modify the format to fit the publication style of *Emerging Infectious Diseases*.

Send documents in hardcopy (Courier 10-point font), on diskette, or by e-mail. Acceptable electronic formats for text are ASCII, WordPerfect, AmiPro, DisplayWrite, MS Word, MultiMate, Office Writer, WordStar, or Xywrite. Send graphics documents in Corel Draw, Harvard Graphics, Freelance, .TIF (TIFF), .GIF (CompuServe), .WMF (Windows Metafile), .EPS (Encapsulated Postscript), or .CGM (Computer Graphics Metafile). The preferred font for graphics files is Helvetica. If possible, convert Macintosh files into one of the suggested formats. Submit photographs in camera-ready hardcopy.

Send all manuscripts and correspondence to the Editor, *Emerging Infectious Diseases*, National Center for Infectious Diseases, Centers for Disease Control and Prevention, 1600 Clifton Road, Mailstop C-12, Atlanta, GA 30333, USA, or by e-mail on the Internet to eideditor@cidod1.em.cdc.gov.

Contents

Emerging Infectious Diseases

Volume 1 • Number 3 *July–September 1995*

Synopses

Streptococcal Toxic-Shock Syndrome: Spectrum of Disease, Pathogenesis, and New Concepts in Treatment	69	Dennis L. Stevens
Spiral Bacteria in the Human Stomach: The Gastric Helicobacters	79	Andre Dubois

Dispatches

HIV-1 Patients May Harbor Viruses of Different Phylogenetic Subtypes: Implications for the Evolution of the HIV/AIDS Pandemic	86	Danuta Pieniazek, Luiz M. Janini, Artur Ramos, Amilcar Tanuri, Mauro Schechter, Jose M. Peralta, Anna C. P. Vicente, Norman K. Pieniazek, Gerald Schochetman, and Mark A. Rayfield
Simultaneous Infection of *Ixodes ricinus* Nymphs by Two *Borrelia burgdorferi* Sensu Lato Species	89	Bruno Pichon, Edmond Godfroid, Bernard Hoyois, Alex Bollen, Francois Rodhain, and Claudine Pérez-Eid
Epidemiologic and Evolutionary Relationships Between Romanian and Brazilian HIV-Subtype F Strains	91	Claudiu I. Bandea, Artur Ramos, Danuta Pieniazek, Rodica Pascu, Amilcar Tanuri, Gerald Schochetman, and Mark A. Rayfield
Electronic Communication Facilitates Investigation of a Highly Dispersed Foodborne Outbreak: *Salmonella* on the Superhighway	94	Barbara E. Mahon, Dale D. Rohn, Sheila R. Pack, and Robert V. Tauxe

Commentary

Reemergence of Ebola Virus in Africa	96	Anthony Sanchez, Thomas G. Ksiazek, Pierre E. Rollin, Clarence J. Peters, Stuart T. Nichol, Ali S. Khan, and Brian W. J. Mahy
Prospects for the Control of Bolivian Hemorrhagic Fever	97	Paul E. Kilgore, Clarence J. Peters, James N. Mills, Pierre E. Rollin, Lori Armstrong, Ali S. Khan, and Thomas G. Ksiazek
